</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>✓ High availability of provided services</td>
</tr>
<tr>
<td></td>
<td>✓ Collocation services at competitive cost</td>
</tr>
<tr>
<td></td>
<td>✓ High transmission rates and low latency</td>
</tr>
</tbody>
</table>

The ATHEX infrastructure consists of state of the art of the following data centers:

**a) Main Data Center:** allows access to the production and test environment, through the FIC – IOCP service

**b) Disaster Recovery Data Center:** allows access to both production and back up services (DR). In case of destructive events at the main premises of Athens Stock Exchange, the DRS will be automatically activated

**c) London Hub Data Center:** the new point of presence of Athens Stock Exchange in Docklands, London. Athens Stock Exchange offers a fully redundant and managed solution (two separate connections from Athens to London)

### With the following connectivity options:

- Leased Lines
- Internet
- Global Extranets (BT Radianz, TNS)
- ATHEX Data Vendors (Subvending case)
