Aluminium Strong momentum for aluminium products Electric cars Strong momentum for copper used for electricity / energy transportation

By geographical segment (FY 2016)

(in values)

Sales in 102 countries

With state-of-the-art production facilities in Greece and a dynamic commercial presence across all key geographies, the aluminium segment is well positioned in the global aluminium industry.

The aluminium segment comprises, the aluminium rolling division, under the Elval brand name and the aluminium processing subsidiaries Symetal, Elval Colour, Vepal, Anoxal and Viomal. It operates 7 plants in Greece, with an annual production capacity exceeding 270,000 tons.

Significant international presence - more than 85% of turnover in sales abroad - promoting its portfolio of products in more than 80 countries.

During the last ten years over EUR 350 mil. have been invested in equipment and R&D for capacity expansion and continuous improvement of quality.

Competitive advantages

Production capability for wide coils (up to 2.5 m) and long slabs (8m).

Medium size – flexible independent supplier.

Upgraded / state-ofthe-art key equipment – Emphasis on R&D. Quality compatible with the highest market standards.

Extensive distribution network.

Strategic alliance with UACJ Corp.

Aluminium rolling

Flat rolled aluminium products and solutions for use in several markets including:

- Sea, road and rail transportation
- Packaging
- Building and construction
- Energy
- Cookware
- HVAC

Capacity: 270,000 tons/year

Aluminium foil rolling

Oinofyta **Greece**

Foil for:

- · Flexible packaging
- Pharmaceutical packaging
- Technical applications semi rigid packaging
- Tea lights
- Household aluminium foil semi, etc.

Capacity: 52,000 tons/year of aluminium foil rolling

Aluminium foil converting

Mandra Greece

Foil for:

- Pharmaceutical packaging
- Flexible packaging
- Cigarette inner liners
- Lidding
- Confectionery, etc.

Capacity: 26,000 tons/year of foil converting

Composite panels

St.Thomas
Greece

Solutions for a complete range of coated aluminium products used in the building envelope:

- Etalbond® aluminium composite panels
- Elval ENF™ coated aluminium sheets and Ydoral®
- Orofe® coated strips for rain gutters and roofing applications
- Functional coating systems Agraphon® and Arypon®
- Coated aluminium strips for rolling shutters.

Aluminium rolling shutters

Nea Artak **Greece**

- Aluminium rolling shutters and doors
- Insect screens
- Spacer bars
- Protection systems
- Home automation
- · Powder coating.

Aluminium coal coating

Thiva Greece

Aluminium coil and strips coating for architectural use.

Aluminium - rolled products/markets

Packaging

- Beverage cans
- Food containers
- Closure caps
- Flexible packaging Household foil

Shipbuilding

- Patrol vessels
- Catamarans
- Yachts
- Ferries

Commercial **Transportation**

- Tipper trucks Road tankers/silos
- Refrigerator trucks
- Cargo rail wagons
- Buses

Aluminium - rolled products/markets

Automotive industry

- Internal parts/heat shields
- Heat exchangers
- Air pressure vessels/ Fuel tanks
- Suspension and brake systemsCoated aluminium sheets and strips for automotive applications
- Aluminium composite panels etalbond for automotive applications

Industrial applications

- Lamp base/transformers
- Renewable energy
- Multi-layer tubes
- Bus ducts

Domestic applications

- Cookware
- White goods

Aluminium - rolled products/markets

Building & Construction

- Façades
- Roofing
- Rain gutters False ceilings
- Roller shutters
- Functional coatings
- Flashings

Versatile and dynamic copper solutions through its copper tubes division, under the brand name Halcor, and its copper processing subsidiaries, Fitco (Greece) and Sofia Med (Bulgaria).

Halcor's copper tube plant is the most efficient plant in Europe and the biggest in EMEA region. It has also one of the three biggest extrusion presses worldwide.

Leader in Europe in copper tubes.

Dynamically growing market presence in other products.

Considerable part of Greek exports. Halcor is a leader in the European copper tubes market and its products are sold in more than 58 countries around the world.

Wide range of products and capable to meet demanding customers' specifications.

Strong input in:

- HVAC&R industry
- Electrical industry
- Production engineering

Competitive advantages

Biggest and most efficient plant in EMEA

State of the art manufacturing equipment and quality procedures

Sophisticated technological support through the innovative Tube Heat Transfer Laboratory

Extensive distribution network.

Established presence in HVAC industry

Copper tubes

Oinofyta **Greece**

HALCOR

2 plants in Greece

Copper tube plant producing:

• Copper tubes with or without plastic coating or industrial insulation

Capacity: 75,000 tons/year

Copper tubes

Oinofyta **Greece**

HALCOR

2 plants in Greece

Foundry producing:

- · Copper billets and slabs
- Copper alloy billets

Capacity: 235,000 tons/year

Copper alloy bars, tubes and wires

Oinofyta **Greece**

Specialises in the production of extruded copper alloy:

- Rods
- Tubes
- Sections
- Wires and mesh
- Antimicrobial copper Cu+

Capacity: 40,000 tons/year

Copper and brass

Sofia Bulgaria SOFIA MED

Specialises in the production of rolled and extruded copper and copper alloy products such as sheets, strips, plates, circles, disks, bare and plated bus bars, rods, profiles, components and wire.

Capacity: 100,000 tons/year

Copper tubes

Gebze **Turkey**

Specialises in the production:

- Ecutherm polypropylene preinsulated copper tube coils
- Polypropylene corrugated A/C drain hose

Capacity: 4,200,000 tons/year

ecutherm copper tubes

Capacity: 1,800,000 tons/year corrugated A/C drain hose

Copper tubes

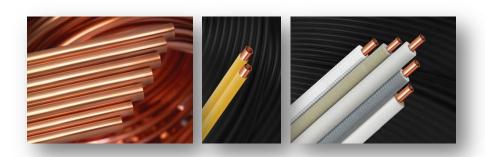

Copper tubes bare, pre-insulated or inner grooved from 4 up to 108 mm for:

Building & Construction

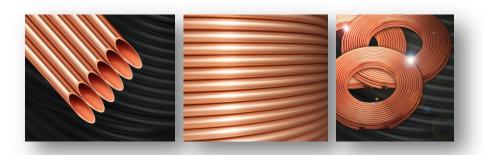

Water supply and Heating networks
Under floor heating and cooling
Air-conditioning
Refrigeration
Natural gas
Medical gas distribution networks
Fire extinguishing networks

HVAC&R

Air-conditioning Refrigeration Heat exchangers

Copper tubes

Copper tubes bare, pre-insulated or inner grooved from 4 up to 108 mm for:

Renewable Energy

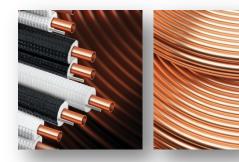

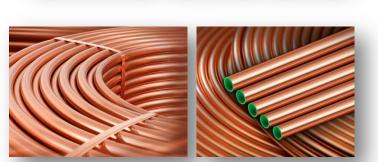

Solar panels Solar system networks Geothermal heating & cooling

Industrial Applications

Fittings
High frequency cables
Boilers
Filters
Various industrial applications

Innovative products - Cusmart®

Copper tubes for:

- Water supply
- Heating (pre-insulated with PE-X)
- Under floor heating

Cusmart [®] provides a complete system along with a wide range of Compression and Press fittings.

Due to combination of high quality plastics with lower wall thickness copper tubes, the replacement cost per ton is lower compared to the cost of a pure copper product.

Meets the requirements and are certified according to DVGW Vp 652, ELOT 1425/1426 and NSF/ANSI 61.

Extruded Products

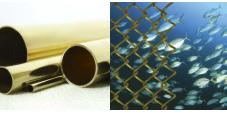

Copper alloy and brass rods, bars, sections, tubes, flats, wires for: Construction, decoration, electrical engineering (electronic control panels, valves, batteries etc.), supports for gutters.

Produced by Fitco and Sofia Med

Rolled Products

Copper and brass and HP alloys in sheets, strips, plates for: Construction (roofing, gutters), electrical engineering (connectors, transformers, boilers, etc.), decoration.

Produced by Sofia Med
